

On-premises SSA Operations Center

powered by  **SSASUITE**

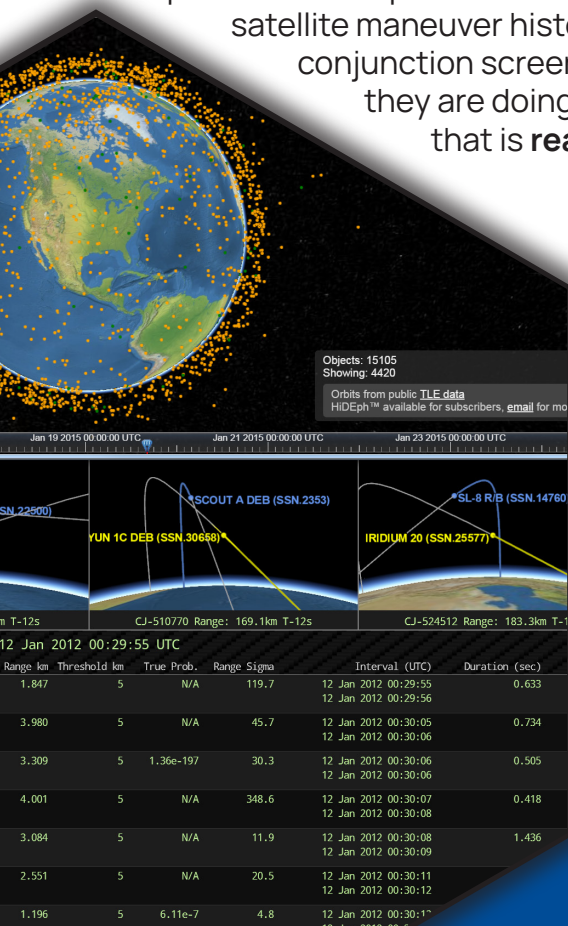

Space situational awareness in an off-the-shelf, enterprise package

Your Catalog • **Your Sensor Data** • **Your Security**

SSASuite is the enterprise platform for a comprehensive space situational awareness operations center. SSASuite employs a service-oriented architecture providing scalability, reliability, performance, full-database integration, secure operations, and web-based user interactions.

Suitable for military, intelligence, and civil applications, SSASuite provides a comprehensive picture of the space domain. Generate threat detection and warning reports. Understand satellite maneuver history and patterns of life. Protect space assets via rigorous conjunction screening. Gain full knowledge of where space objects are and what they are doing on a highly automated and rigorously tested enterprise platform that is **ready now**.

Benefits

- Actionable SSA knowledge
- Status monitoring
- Anomaly detection
- Customizeable to your CONOPS
- Significant improvement in response time

Features

- Highest accuracy space object catalog
- Process any sensor SSA data in all orbit regimes
- Automated, near real-time processing
- Tested in high availability environments
- Realistic uncertainty
